DIOCESE of OXFORD
A Christ-like Church for the sake of God's world

Diocesan Advisory Committee for the Care of Churches

10.00am, Monday 14th September 2026, Church House Oxford, Kidlington

MINUTES

Welcome and Apologies

Attendance: The Revd Canon Prof William Whyte, The Revd Preb Jane Haslam, Mr Peter Preston, Mr Bryan Martin, Mr Lynn Matthias, Mr Rupert Griffin, Mr Julian Munby, The Revd Canon Dr Peter Groves, Prof John Missenden, Revd, Deiniol Heywood, Mr Philip Kite, Mr Alex Wenham, Mr John Pritchard, Dr Louise Durning, Dr Nicola Coldstream, Mr Nick Wright, Mrs Sarah Tattersall

Staff: Ms Liz Kitch, Ms Jennie Schillig, Ms Sophie Hammond, Mrs Hannah Robertson, Mrs Emily Jackson, Ms Evie Foley

Apologies received: The Revd Prof Diarmaid MacCulloch, Dr Martin Bridge, The Revd Canon Val Plumb, Mr James Mackintosh, The Revd Paul Cowan, The Venerable Stephen Pullin, Ms Charlotte Robinson, Mrs Geraldine O'Farrell, Mr Jasper Fulford-Dobson, The Venerable David Tyler, Anna Eavis, Mr Jon Avent, Mr Philip Wharton, The Venerable Cassa Messervy, Ms Joyce Christie, Dr Dan Miles, Mrs Freya Morris

Dates of future meetings:	• Monday 9th November 2026, Christ Church Research Centre • Monday 18th January 2027, TBC • Monday 8th March 2027, TBC

3	**Correspondence, policy and other matters for consideration**

Following an extended period on sick leave this year, Oliver Mitchell has decided that he will not be returning to his post with the Church Buildings Team. The Committee joined the CBT in thanking him for his contribution to the work of the team and wishing him well in the future. Recruitment for a new CBO will begin soon in hopes that they will join the team early in the new year.

The diocese has been awarded a further £129,000 pounds in Minor Repairs and Improvements funding for the second triennium. It is anticipated that a first round of funding will be opened in the autumn.

A new page has been added to the CBT webpages explaining the upcoming launch of the Building Management Portal. As a reminder, the current Online Faculty System will go offline on 30 September to allow migration to the new portal which it is hoped will go live on 6 October.

The Buildings for Mission part funding of the Senior Church Buildings Officer post to carry out works with struggling churches came to an end in June. A report was presented to the DAC concluded that the challenges facing struggling churches are increasingly characterised by a combination of ageing historic buildings, rising repair costs, limited volunteer capacity, and reduced local financial support. In this diocese, small rural churches seem to be particularly vulnerable. A proactive diocesan approach, informed by QIR data and focused on early intervention, would enable support to be directed where it is most needed, helping prevent further deterioration of significance heritage assets and improving the likelihood of successful repair and conservation projects. It was agreed that the report should be circulated to raise awareness of the need for additional resource.

NEWBURY: St Nicholas			
Application Ref: 2024-095801	Archdeaconry: Berkshire	Listing: Grade I	HR
Proposals:	Major reordering scheme with the creation of an extension and installation of a new heating system		
Subcommittee:	Mr J Pritchard, Mr L Mathias, Rev Prof D MacCulloch, Mr J Radice		
Project architect:	Acanthus Clews		
Statutory consultees:	Historic England, HBAP, Vic Soc, SPAB, LPA (Planning Permission)		
Site visit attendees:	Mr J Pritchard, Mr L Mathias, Rev Prof D MacCulloch, Mr J Radice, Mrs H Robertson		
Date of visit:	6th August 2026		

Previous Minute: January 2025

The committee resolved to ratify the Church Building Officer's feedback report, incorporating the following advice.

Heating

To further verify the anticipated use of the church, the DAC recommended that the parish carry out research into the use patterns of similar large market town churches. It was pointed out that many parishes with church buildings of this nature are able to fill their spaces regularly, if their building allows. The churches of St Aldates, Oxford and St Mary's, Maidenhead were suggested as examples which could serve as useful comparisons to St Nicholas Church. The DAC highlighted that although an air source heat pump would enable the parish to reduce their carbon footprint, the system would be less efficient in colder weather, and this should be taken into consideration when calculating its future usage and cost over winter. It was noted that the proposed heat pumps were not shown on the 3D visuals, so the DAC were unable to assess their visual impact. It is asked that they are included in any future submission of 3D visuals.

Extension

The DAC agreed that an extension of the size proposed would be very visible from the lane and would be very intrusive in its setting. The committee agreed that a smaller extension would be preferable, as it would lessen the impact on the church and the churchyard. It was suggested that a 'hybrid' solution would be possible, with some of the utilitarian facilities housed in the main body of the church. It was suggested that the parish should explore the option of accommodating toilets at the west end of either aisle.

September 2026 minute:

The committee ratified the feedback given by the delegation in the site visit report and added the following advice.

Extension to the north of the church

The committee agreed the design options offered in the latest feasibility study would have a harmful impact on the architecture of the church. The committee felt that the oblique footprint of glazed link and pavilions was awkward and disjointed, and that it would be preferable for the extension to sit in parallel to the church, incorporating the symmetry of the north aisle. They commented that the contrasting design was reflective of the past work and style of the architects and reiterated their earlier advice that the extension design should better respond to the form and context of the church building.

The committee was concerned that the layout gave a sense of over-engineering and that there was some genuine scope to reduce the size of some rooms. Some of this flexibility may lie in the size of the plant room; once the parish know the number of water cylinders and buffer tanks to accommodate, they will be able to define the size of the space with more accuracy. It is advised that there is scope to reduce the size of the storage room by incorporating some storage into the church building, which can be achieved without causing harm to the church interior.

It was commented that given the size of some of the events hosted by the church, it was not logical for the church to provide only two toilets. To minimize queuing, it was advised to utilize more of the footprint with an extra toilet.

Removal of pews
The committee were not convinced that the parish had demonstrated the need to permanently remove all the pews. It was commented that much of the character of the interior was attributed to Woodyer's reordering and that removing all the pews would have a significant impact on the character of the church. For the occasions when the church was not in use, and only open to visitors, it was felt that the interior completely cleared of pews would be bare and unwelcoming. However, it was agreed that the parish had demonstrated the benefit of clearing the pews for special occasions, and it was commented that clearing the whole space for large events, as seen in other Berkshire churches, would bring great benefit to the parish. It is advised that the parish explore options of retaining a selection of pews in the middle of the nave, which can be set aside for large occasions, as advised in the visit report.

DENHAM: St Mary the Virgin			
Application Ref 2025-114143	Oxford	Listing: Grade I	EF
Proposals:	Disposal of tower clock mechanism dated 1740		
Subcommittee:	Mr Rupert Griffin, Mr Julian Munby		
Project architect:	None		
Statutory consultees:	Church Buildings Council		
Site visit attendees:	None		
Date of visit:	None		

September 2026 Minute:
The clock is a two-train cage frame and was presented in 1740 by the Lady of Denham Manor to the church. Mr Rupert Griffin, DAC clock advisor, has noted that while the clock may not be the earliest example of something approaching a dead-beat pinwheel escapement, it still represents an unusual piece with historical significance.

In the 1960s, the clock mechanism was configured to an auto wind system with the 'monkey climbing a stick' chain system. By the mid-1980s issues with the auto wind system and pivot wear became apparent. In 1991, Mr David Birt, the then Clocks Advisor, visited the church. Mr Birt noted wear to the pivots and damage to the escapement and that an expensive overhaul was needed. Mr Birt suggested (with regret) that the best way forward was to remove the old clock mechanism and install a new one. Since 1993, the 1740 mechanism has been housed in a large cabinet in the north aisle of the church. The parish feel that it is cumbersome and reduces the usability of the north aisle and its removal would allow more space, especially for a prayer area.

The parish have been offered the option of either restoring the clock with the advice and support of Mr Griffin or relocating the clock into tower in a mothballed state, retaining the potential for a future generation to reinstate the clock. The parish initially rejected both options, however prior to the committee meeting the parish met with Mr Griffin and a solution was found. The parish are to pursue grant funding for the mothballing of the clock and storing it in the deadening chamber within the tower.

The Committee resolved to issue a Not Recommend for the regularising faculty for the removal of the clock into storage and for the disposal of the clock. The Committee disagreed over whether the clock should be placed within the tower or kept on display within the nave, however they resolved to suggest that the clock should be placed on display with the Chancellor to determine.

WALLINGFORD: St Mary le More			
Application Ref 2021-062398	Archdeaconry: Dorchester	Listing : Grade II*	SH
Proposals:	Installation of Solar Photovoltaic Panels as part of wider decarbonisation project (involving heating overhaul to include roof-mounted installation of Air Source Heat Pumps)		
Subcommittee:	Mr Peter Preston; Mr John Pritchard, Ms Geraldine O'Farrell		

Project architect:	David Gadsdon- M&E Consultant for EEP Consultants, Henry Sanders, QI architect.
Statutory consultees:	Historic England, CBC, Vic Soc, SPAB, HBAP, LPA (Planning Permission- granted)
Site visit attendees:	Mrs Sophie Hammond, Mr Peter Preston; Mr John Pritchard
Date of visit:	17.06.2026

September 2026 DAC Minute:

The DAC acknowledged that this was an important case for this Diocese in a period of transition for applications for visible solar arrays on listed churches generally. A single local precedent exists at Woodstock St Mary Magdalene for a partially visible array on a listed church, the visibility of which is highly comparable with that of the proposals for St Mary le More. It was noted that the statutory consultees were all supportive of the proposals. The DAC agreed that as St Mary le More falls within the Diocese's top 10% of carbon-emitting churches, committing to completely relinquish reliance on fossil fuels in favour of air source heat pumps was laudable.

It was considered that the parish had demonstrated sound justification for the array through their commitment to reducing their carbon footprint and improving energy efficiency via other compatible interventions, plus the high proportions of self-consumption of electricity the panels would generate (which would be improved further by the addition of batteries, should the parish decide to proceed with this). The building's extensive use, its compatibility with heat pumps and the very limited visibility of the chancel and nave roofs (being substantially obscured by the south aisle roof), made the proposed installation of solar panels viable and the parish justified this through various pieces of evidence they provided. The committee commended the positive way in which the parish and their M&E consultant engaged with the process and sought the requisite associated specialist input to ensure the feasibility of the project has been exemplary. The committee considered the supplementary installation of Herschel Horizon heaters in the subdivided west end ancillary rooms was sensible and minimally obtrusive.

The DAC therefore agreed that the parish has had due regard to the Church of England's Net Zero guidance, and agreed to issue a Recommend Notification of Advice for the solar panels, the optional inclusion of battery technology, plus the overhaul of the church's heating, including the ASHPs and the infrared units in the first-floor west end spaces, subject to:

- precise cable routes being agreed prior to work starting
- written confirmation that the scheme is acceptable to the church insurers, and incorporation of any additional fire protection measures recommended by the insurers
- the specialist recycling of the panels at the end of their working lives
- the installation being inspected annually for damage or wear and tear
- the usual conditions relating to CDM legislation, electrical installations, informing insurers, and adhering to legislation concerning bats

6	**Casework – To Note**

MIXBURY: All Saints			
Application Ref 2026-131882	Archdeaconry: Dorchester	Listing : Grade II*	SH
Proposals:	Creation of external WC south of church		
Subcommittee:	Mr Bryan Martin, Mr Julian Munby		
Project architect:	Henry Sanders, Hestia Architects		
Statutory consultees:	Historic England, CBC, SPAB, Victorian Society, HBAP, LPA (Planning permission)		
Site visit attendees:	Mrs Sophie Hammond, Mr Bryan Martin, Mr Julian Munby		
Date of visit:	29.06.2026		

September 2026 DAC Minute:

The DAC was notified that the CBO would be issuing a Recommend Notification of Advice for the installation of a standalone WC to the south of the church once the following points had been resolved/agreed

- Consultation with the statutory consultees. the LPA (planning permission) and the Environment Agency (consent for the trench arch)
- Detailed designs being agreed with the subcommittee
- The removal or relocation of the shed
- The usual provisos concerning CDM legislation, archaeology and insurers being informed

It was noted that this application would require attempts to consult the Heirs at Law with regard to the relocation of the gravestone to George and Sarah Wallin slightly to the east of its current location, to incorporate the small building.
