

The General Election and the Environment

Five Key Asks...

...from the National Church, for prospective parliamentary candidates. If elected, what would they do under these headings?

Energy efficient and low carbon homes. Ensure all new build houses are built to net-zero standards. Fund the retrofitting of all public sector housing to increase energy efficiency. New homes should be highly energy-efficient and run without using fossil fuels. Existing homes should become easier and cheaper to keep warm and dry.

Leave fossil fuels behind and invest in renewable energy. Stop investment and exploration in new sources of fossil fuel extraction. Focus on moving to renewable technology. Improve the capacity and resilience of the National Grid.

Loss and Damage Fund. Keep the UK's promise to support a fund for countries already suffering because of climate change, including a commitment of financial support from the UK.

Nature Recovery. Keep the UK's promise to halt and reverse the loss of wildlife. Manage 30% of the land and sea for nature by 2030. Known as '30 by 30', the UK joined this global pledge when it was agreed at the biodiversity COP15 in December 2022.

Introduce a Climate and Ecology Bill. This is a bill which aims to join up the climate and nature crises, cut emissions, halt the decline of nature and ensure this is done fairly and with the involvement of the UK public.
