

Diocesan Advisory Committee for the Care of Churches

10.00am, Monday 11th November 2024, Christ Church, Research Centre

MINUTES

Welcome and Apologies

Attendance: Ms Abigail Lloyd (Chair) Ven David Tyler Archdeacon of Dorchester (Vice Chair), Mr Alex Wenham, Mr Nick Wright, Mrs Freya Morris, Mr Julian Munby, John Pritchard, Prof John Missenden, The Revd Preb Jane Haslam, Mr Mike Holmes, The Revd Deiniol Heywood, Lynn Mathias, The Revd Professor Diarmaid Macculloch, Ms Esther Robinson-Wild, Dr Nicola Coldstream, The Revd Canon Dr Peter Groves, Ms Charlotte Robinson, Dr Louise Durning

Observers: Mrs Sophie Hammond, Mrs Emily Jackson, Ms Liz Kitch, Mrs Hannah Robertson, Ms Jennie Schillig, Mr Oliver Mitchell, Hannah Mann, Mrs Carolyn Jupe, Mrs Debbie Perry, Keri Dearmer

Apologies received from: The Ven Jonathan Chaffey, Mr Bryan Martin Mr Peter Preston, Dr Martin Bridge, Mr Phillip Wharton, Mr Barry Williams, The Revd Liz Jackson, Mr Andy Thearle, The Ven Stephen Pullin, Mr Jon Avent, Mrs Sarah Tattersall, Mrs Joyce Christie, The Rev Katie Tupling, The Revd Val Plumb

The two minute silence was observed at 11 am.

1	Minutes of meeting held on 16th September 2024 were approved	Chair	Attached
2	Declarations of interest Mike Holmes, Bryan Martin - Woodstock St Mary Magdalene Diarmaid Macculloch - Oxford St Barnabas	Chair

- Monday 10th March 2025 Christ Church, Research Centre
- Monday 12th May 2025 Christ Church, Research Centre

3	Correspondence, policy and other matters for consideration
---	---

Training day held in collaboration with the Environment Team

The Head of Church buildings gave a verbal report on the training day recently held at Church House highlighting the importance of taking a 'fabric first' approach, and maximising 'quick wins' in the journey to net zero.

Non-disclosure Agreements and good governance

The Diocesan Registrar has recently given the following advice regarding DAC members and the Church Buildings Team being asked to sign Non-Disclosure Agreements by petitioners:

If they are seeking to obtain permission to carry out works or to establish whether permission is needed, then they would be consulting with a statutory body (i.e. the DAC) whose responsibility it is to provide advice to the Court (ie. the consistory court for the diocese of Oxford) whose function is to consider the applications for such permission; therefore, as a court of the land it is not possible to enter into any non-disclosure agreement.

The Chair gave a verbal reminder of the requirements for conflicts of interest, confidentiality and subject access requests.

5	Casework - For Discussion
---	----------------------------------

WOODSTOCK: St Mary Magdalene

Application Ref 2024-104366	Dorchester	Grade II*	Sophie Hammond
Proposals:	Installation of solar panels on south aisle and south roof of nave		
Project architect:	JBKS architects		
Statutory consultees:	Historic England, CBC, Vic Soc, Georgian Group, SPAB		
Site visit attendees:	Rev Preb Jane Haslem, Mr Peter Preston (Mr Mike Holmes was in attendance but representing the parish)		
Date of visit:	14.10.24		

November 2024 Minute:

The DAC was content to agree to the proposals for arrays on both the South Nave and South Aisle roofs, subject to Planning Permission (which was subsequently granted), consultation with the statutory consultees, fixing methods being agreed, and details of the embodied carbon, and the potential for recycling at end-of-life of the arrays being provided. The parish would also need to consult the DNO (Distribution Network Operator) to ascertain regional limits for exporting to the grid, and whether permission for this will be needed.

The DAC recognised that this is a watershed case for this Diocese in a period of transition for precedents for visible solar arrays on listed churches generally. While arrays have been approved on Kings' College Chapel and York Minster, proposals for an array at St Anne's, Ings, in Cumbria were dismissed by the Planning Inspectorate, upholding the decision of the Lake District National Park Authority to reject the installation on the grounds that the public benefits did not outweigh the visual harm posed by an array.

St Mary Magdalene, with its individual architectural elements from different periods, is dominated by its Georgian tower by John Yenn. This is resonant of nearby Blenheim Palace and in keeping with much of the rest of the town. While it cannot be said that the whole is particularly cohesive, it is nonetheless an attractive and distinctive building. Its setting, slightly set back from the High Street, within a conservation area and close to the Blenheim UNESCO world heritage site, arguably contributes equally to its significance. Thus a solar array anywhere on the church would involve a degree of harm. The DAC agreed that the visibility of the panels, even with the raising of the roof deck, would be limited to narrow sections of the south side roofs from certain points in the churchyard, and high up the bank of the lane behind, on the less prominent and overlooked side of the church.

The DAC agreed that the PCC has demonstrated a commitment to improving the energy efficiency of the church by those means practicable, and that due regard has been had to the Net Zero guidance in this application. While recognising that a single array on the south aisle would represent a degree of harm, it would preserve the significance of the building to a greater degree than the double array and demonstrate a

significant improvement in the parish's progress towards Net Zero. However, it is also recognised that a single array would considerably increase the payback period for the PCC and make an installation considerably less financially viable, as the amount of electricity they could export would be heavily reduced.

The DAC was sympathetic to the fact that, alongside a desire to improve the efficiency of the building, the potential for income generation was a significant driver in the proposals for both arrays. Given the considerable financial pressures on churches to sustain themselves post-COVID in addition to the climate crisis, the DAC considered that income generation could be considered a relevant justification for solar installations, provided this is not the sole justification for an installation, and a demonstrable commitment to reducing energy consumption and improving energy efficiency would still need to be evidenced in any such application. Each case will still need to be considered on its own merit, balancing benefits against any particular harms in a given case.

It was noted that the CBC are supportive in-principle, but asked for clarifications on the following:

- The visual impact (in a statement of significance)
- Financial and carbon benefits and the sale/export of surplus energy
- PV mounting methodology

The SPAB are content to defer to the views of the Vic Soc, who have also asked for a thorough assessment of the impact of the installation on the significance of the building. This has been received and a second round of consultation initiated.

GREAT MILTON: St Mary the Virgin

Application Ref 2024-093895	Dorchester	Grade I	Emily Jackson
Proposals:	Re-ordering of church interior, adding a kitchenette and disabled WC		
Project surveyor:	David Arnold, Arnold Bartosch		
Statutory consultees:	Historic England, CBC, Vic Soc, SPAB, HBAP		
Site visit attendees:	Mrs Emily Jackson (CBO), Mr John Pritchard, Mr Julian Munby, Mr John Radice, The Ven David Tyler Archdeacon of Dorchester.		
Date of visit:	12 th October 2023		

November 2024 minute:

The committee were supportive of the need to introduce facilities into the church. There was concern that the Statement of Significance may undervalue the significance of the stone benches surrounding the perimeter of the church, these are unusual survivals and there are very few examples of such benches found in parish churches. It was the view of the committee that the stone bench should be retained but the loss of some of the oak boarding, installed by GG Scott, above may be acceptable. It was agreed that the parish should be encouraged to reconsider the juxtaposition of the bench on the west wall and the proposed servery. It may be that fitting the units over the bench is a more appropriate solution which may also allow the servery enclosure to be extended to store the moveable units when not in use.

There remains a concern that there may be archaeology under the floor at the west end of the nave, where services are proposed to be run. The parish may wish to seek an interim faculty to investigate the sub-floor prior to developing the proposals further.

The current proposed drawings show the relocated font in two different locations. The committee discussed the movement of the font in relation to canon F1 and requested that it is brought to the attention of the parish for consideration in their proposals and that it is justified in their statement of needs.

The following further information was agreed to be required from the parish to progress the application, this includes but may not be exclusive to.

- A full set of plans and elevations showing the proposals including.
 - The detail of how the proposed servery unit will abut the stone bench and how the required storage will be provided.
 - The finish of the materials
 - Detail regarding where the moveable units will be stored when not in use.
 - Detail regarding the service trenches to be run internally – archaeology should be expected, and an interim faculty may be needed to explore this.
 - The proposed route of the foul drain crossing the churchyard.
- Explanation of the following.
 - Why keeping the office open to the toilet is the preferred solution.
 - Why the parish have decided not to remove the block of pews at the rear of the nave.
 - What will be done with the removed pews.
 - The significance of the items to be removed from the east end of the south aisle, these are not discussed in the Statement of Significance
 - Where the following items will be relocated to or how they will be disposed of.
 - timber and textile artifacts at the west end of the south aisle
 - items from the east end of the south aisle
 - All pews and benches to be *removed*
- *Development of the heating proposals, the parish should discuss next steps with the CBO following the heating surgery.*

The committee therefore gave in-principle agreement to the following items of the proposals subject to detailed design and provision of the information above;

- *Siting the new servery at the west end of the south aisle*
- *Removing the pews from the south aisle and second row from east in the nave*
- *Siting the WC and small office area in the footprint of the existing vestry in the north aisle*

6	Casework - For ratification of officer recommendation
---	--

OXFORD: St Barnabas			
2024-099465	Oxford	Grade I	Sophie Hammond
Proposals:	Replacement of 1976 organ using Father Willis pipework and new casework		
Project architect:	Nicholsons' Organ Builders		
Statutory consultees:	BIOS, Church Buildings Council, Historic England		
Site visit attendees:	N/A		
Date of visit:	N/A		

November 2024 minute:

The committee acknowledged that the latest indicative design was simpler and more in-keeping with the architecture of St Barnabas than the attractive but elaborate, Jacobean-style design discussed in 2019. However, there was some concern that, given its highly prominent location, the case as proposed would compete with the chancel, for example, with its crocketed pediment referencing the high altar canopy. It was recommended that something subtler still and more carefully restrained would be preferable. The committee also advised that the choice of colour (and gilding) for the case would be very important, and that it would be useful to see any refined design in full colour.

The DAC consented to delegate the agreement of the detailed design for the case to a subcommittee which would be augmented to include architectural historians on the DAC, to ensure that the significance of the east end is fully considered in any revised design. The committee agreed that this application would not need to revert to the full committee unless the revised design is a significant departure from the existing design. The CBC, BIOS and the Diocesan Organ advisers are content with the proposals as they stand. The comments of Historic England are awaited.

OXFORD: St Frideswide

2023-087225	Oxford	Grade II*	Emily Jackson
Proposals:	Upgrade and extension of servery		
Project architect:	Robert Montgomery		
Statutory consultees:	N/A		
Site visit attendees:	Mrs Emily Jackson (CBO), Ms Charlotte Robinson, Mr Nick Wright (not at site visit)		
Date of visit:	21 st August 2023		

November 2024 minute:

The Archdeacon who could not be present at the meeting, had sent an email confirming his support of the proposals to the CBO in advance and this was relayed to the committee. The committee supported the principle of the proposals; however, concerns were raised that the design choice to omit a fridge from the proposals might result in a request for a freestanding fridge to be added in the future and the CBO agreed to discuss this further with the parish.

The committee supported the principle of the proposal to install a new servery in the southwest corner of the nave of the church and agreed to delegate the detailed design of the new servery to the sub-committee with the following details to be agreed.

- Relocation (or lifting) of the angels.
- Agreement of the location of the electrical sockets.
- Selection of worktop materials, or design of an appropriate cover.

STANFORD-IN-THE-VALE: St Denys

2024-100322	Dorchester	Grade I	Sophie Hammond
-----------------------------	------------	-------------------------	----------------

Proposals:	Removal of the pews in the church (previously agreed under NOA for wider reordering in 2015, and a further time-limited NOA in 2021); regularisation of purchase of 50 Howe 40/4 chairs in a light wood finish
Project architect:	N/A
Statutory consultees:	Historic England, CBC, SPAB, the Victorian Society, and the LPA.
Site visit attendees:	Ven David Tyler, Mr Bryan Martin, Mrs Sophie Hammond
Date of visit:	7 th February 2024
November 2024 Minute:	
<p>Given that the DAC has previously agreed to the removal of all the pews (which came from Hatford Holy Trinity), the committee was content to agree this aspect of the application again. Because of the retrospective nature of the purchase of the 50 Howe 40/4 chairs, which are good quality but regrettably paler in finish than would have been preferable for this setting, the DAC agreed to issue a Notification of Advice <i>not objecting</i> to the application, subject to consultation with the amenity societies and Historic England. The committee was keen to remind the PCC that any future purchase of furniture would need separate faculty permission, and that it must not be presumed that permission would be granted for more furniture of the same finish. When the time comes to consider finishes for new joinery and any additional furniture as part of the proposed reordering, the committee advised that it would be important for this to be a good match, tonally speaking, with the remaining woodwork in the church, i.e. that of the roof, pulpit and font.</p> <p>The DAC agreed to issue a Notification of Advice <i>not objecting</i> to the application, subject to consultation with the amenity societies, the LPA and Historic England.</p>
