

Diocesan Advisory Committee for the Care of Churches

10.00am, Monday 9TH March 2026, Church House Oxford

AGENDA

Welcome and Apologies

Attendance: The Revd Canon Prof William Whyte (Chair), The Venerable David Tyler, The Venerable Jonathan Chaffey, The Revd Preb Jane Haslam, Dr Louise Durning, Mr Lynn Mathias, Mrs Sarah Tattersall, Prof John Missenden, Mr John Pritchard, Mr Julian Munby, The Revd Prof Diarmaid Macculloch, Mr Bryan Martin, The Revd Deiniol Heywood, Dr Nicola Coldstream, The Revd Canon Dr Peter Groves, Mr Alex Wenham, Dr Dan Miles, Dr Martin Bridge, The Revd Canon Val Plumb, Mr Nick Wright

Staff: Ms Liz Kitch, Ms Jennie Schillig, Mrs Sophie Hammond, Mrs Emily Jackson, Mrs Hannah Robertson, Ms Evie Foley, Mrs Debbie Perry

Apologies received: Kim Grosvenor, The Revd Canon Paul Cowan, Mrs Geraldine O'Farrell, Mr Philip Wharton, Rachel Fletcher, Mr Mike Holmes, Mrs Freya Morris, Ms Charlotte Robinson, Revd Katie Tupling, Ms Joyce Christie

1	Minutes of meeting held on 19th January 2026	Chair	Attached
2	Declarations of interest <i>New College - Revd Canon Dr Peter Groves</i> <i>Forest Hill - Dr Louise Durning</i>	Chair	
3	Correspondence, policy and other matters for consideration		
	<i>EHS Aura FIR Heat and Light Chandelier</i>	JS

Dates of future meetings:

- Monday 11th May 2026, Christ Church, Research Centre
- Monday 20th July 2026, St John's College, Oxford
- Monday 14th September 2026, Church House, Oxford

3

Correspondence, policy and other matters for consideration

Infrared heating

The Church Buildings Team are receiving a substantial number of applications for the installation radiant heating in various forms. These range from far infrared chandeliers to near infrared bar heaters. In particular, applications are being received for medium wave infrared units including the new Aura chandelier from EHS. These units produce visible light and operate at higher temperatures than similar far infrared units. They also tend to have a more industrial appearance because of the need to include a reflective foil backing. The CBT generally encourage parishes towards far infrared units which have a more subtle appearance and, as they do not omit light, are considered to have a less adverse impact on interiors. However, recent experience has shown that far infrared units need to be mounted lower than suppliers have originally indicated. The CBT asked for the DAC's views on whether units which emit light are considered acceptable and where these might be used.

The committee identified four issues to consider when reviewing applications for the installation of infrared units (in no particular order):

- The aesthetics of the fitting and its impact on the character of the interior of the church;
- The impact of light emitted;
- The potential for damage to delicate fabric; and
- The efficacy of this type of heating.

The DAC recognises the need to move away from fossil fuels and considers that we are in a transitional phase with new units regularly coming onto the market. The committee agreed that there is insufficient data available from suppliers on their products and that this, coupled with a lack of national guidance, makes it difficult to formulate a policy for these units. Where no damage is done to historic fabric by heat transfer or poor placement of fixings, it is hoped that the use of this type of unit will be a short but reversible chapter in the life of a church building.

The discussion concluded that, while there is no fundamental opposition to medium wave infrared heaters, applications would continue to be reviewed on a case-by-case basis taking into the account the significance of the interior and the sensitivity of the fabric. The Revd Canon Val Plumb, a DAC member with lived experience of disability, noted that the red glow from medium and near infrared units can cause difficulties for people with visual impairments. The DAC expressed a preference for far infrared where appropriate.

Summary of Church Buildings Team activity since last meeting:

- Liz and Hannah Mann met with representatives of Fairheat and Oxford St Michael at the Northgate to discuss the connection of the church, and at least six others, to the district heating network.
- Jennie, Sophie and Evie held the initial meeting of a working group focusing on developing a study around electric heaters. These initial discussions look to scope the project by seeking input and reflections from colleagues working in this area, including Geraline O'Farrell, Adrian Fox (Environmental Sustainability Officer at National Church), Tobit Curteis, Alison Riggs (Diocesan Environment Action Delivery Co-ordinator), Matt Fulford (Inspired Efficiency) and Diana Evans (Historic England). A project proposal and plan will be delivered to the May DAC meeting for information.
- Liz and Kim Grosvenor, Director of Secretariat, met with Professor Becky Malby to plan an away day for the Church Buildings Team, which will also be attended by a number of the Archdeacons, to consider how we can best serve parishes whilst also making work volumes sustainable. The day will take place on the 21st April and we will summarise the reflections and any suggestions to the May DAC meeting.

Net Zero Funding

LK noted that thanks to the hard work of Hannah Mann, the diocese has secured second triennium funding for continued net zero work. The committee offered their congratulations and thanks to Hannah.

Diocesan Disability Adviser

Revd Katie Tupling had hoped to attend the meeting which was to be her last as Disability Adviser. Although she was unable to be present, the committee offered their thanks for her contribution to the work of the DAC. Members expressed that they would miss her very helpful contributions to discussions during site visits.

---	---------------------------	--	--	--	--	--	--	--	--

WENDOVER: St Mary			
Application Ref 2025-115362	Buckingham	Listing : Grade II*	JS
Proposals:	Sound attenuation measures for HS2		
Subcommittee:	Mr Peter Preston, Revd Deiniol Heywood, Mr John Pritchard		
Project architect:	Hamiltons Architects		
Statutory consultees:	Historic England, CBC, SPAB, Victorian Society, HBAP		
Site visit attendees:	Mr Peter Preston, Revd Deiniol Heywood, Mr John Pritchard		
Date of visit:	23 October 2025		
March 2026 minute:			
The parish obtained funding from HS2 to provide sound attenuation to mitigate the impact of the new railway line which will run within 280m of the west end of the church. Having investigated various options for reducing the impact of the passing trains on the internal environment of the church, the parish have been advised that they must provide the following mitigation: • Sound insulation to the nave and aisle roofs; • Acoustic secondary glazing to the nave clerestory and aisle windows; • Sound insulation to the tower arch; and • Acoustic secondary glazing to the glazed door to the north porch. It was clear to the DAC delegation that the noise impact caused by HS2 poses an existential threat to Wendover St Mary as a church, whether for services or as a concert venue, and as a place of quiet and peaceful prayer and contemplation. In the circumstances, the delegation anticipated that the DAC would be supportive of appropriate acoustic insulation measures, even where these go beyond what might normally be considered appropriate treatment of a listed church building. Following the visit, the parish have assembled revised proposals to address the points raised by the delegation in the SCBO's email following the visit including: • Calculations of the attenuation for each proposed mitigation; • Revision of the roofing proposals to include raising the copings of the nave and aisle to maintain the same relationship with the roof plane;			

- Replacing the existing single ply membrane to the aisles with zinc; and
- Omitting the sound proofing to the north porch in favour of replacing the existing glazed doors with acoustic glazing.

The subcommittee are content that the need for sound attenuation outweighs the harm from this element of the proposals.

St Mary's is fortunate to have a significant collection of stained glass windows by well-known Victorian glass artists. In 1875 stained glass, to Street's design, made by Clayton & Bell was inserted in the east window and the north and south windows of the sanctuary. There are a further seven windows by Clayton & Bell in the south chancel aisle (Lady Chapel), south nave aisle and west window, all given by members of the Smith family between 1886 and 1906, mainly as memorials. There are a further four windows by James Powell & Sons in the north aisle dating between 1889 and 1902, with a fifth designed in the 1890s but not installed until 1930. The windows of the chancel and sanctuary are not included in the proposals.

The proposal for the aisle windows to leave the existing stained glass panels in the glazing grooves and to supply single sealed acoustic panels externally in front of the mullions and tracery incorporating little or no ventilation goes against clear and explicit guidance from the Church Buildings Council. The committee supported the view of the subcommittee that insufficient evidence has been provided to demonstrate that this intervention is the most practical and viable means of achieving sound attenuation while minimizing the risk to this important collection of Victorian stained glass. The Committee also recognized that, given the advice of the CBC, the bar for demonstrating this is high.

The DAC resolved to give in principle support to the works to the roofs, tower arch and north porch doors. The need for acoustic glazing to the nave aisle and clerestory was accepted but the committee encouraged the parish to work with an ICON accredited glazier to develop proposals for providing acoustic glazing in the form of external protective glazing. The DAC delegated resolution of details of the proposals to the subcommittee prior to the issuing of a Recommend Notification of Advice.

New College Chapel

Application Ref 2026-123703	Oxford	Listing : Grade I	JS
Proposals:	New Song School development in Chapel Yard, and refurbishment of the vestries		
Subcommittee:	Mr Julian Munby, Dr Nicola Coldstream, Ms Charlotte Robinson, Mrs Sarah Tattersall, Ms Geraldine O'Farrell		
Project architect:	Alice Milligan, Caroe Architecture		
Statutory consultees:	Historic England, CBC, SPAB, HBAP, Victorian Society		
Site visit attendees:			
Date of visit:			

Previous Minutes:

September 2015

The committee noted and endorsed the report of the officers on the proposed refurbishment and rationalisation of the existing song school and vestries, and creation of an infill building in the chapel yard between the chapel north wall and city wall. The committee was supportive of the proposals in general, agreeing that there was a clear need to approve the existing accommodation. However, it was not considered that there was any virtue in the new construction standing back from either the city or chapel wall. A junction direct to these walls, with both expressed uncovered internally, would be simpler and preserve the important intramural relationship which is the defining characteristic of the existing space. The committee considered that, with the exception of this relationship and the walls themselves, the visual and aesthetic significance of the space was negligible. Improved access to and visibility of the city wall from within the yard should be a key aim of the proposals, but access to the walk need not be from within the yard space given that it continues beyond the antechapel and terminates against the west wall of the cloister. The committee encouraged the architect to design a roof that should be lightweight in appearance but that can be walked on for ease of maintenance; care should be taken that external acoustic effects (rain, wind) are taken into account just as much as those internally. Archaeological investigation should take place before any detailed roof design so that load bearing elements of the structure can be placed carefully in order to minimise archaeological disturbance. The committee hope that these comments would be

helpful and looked forward to working the college, architect, and other consultees as these proposals developed.

July 2017

The Committee resolved to ratify the site visit report and supported the principle of the scheme. The Committee resolved to reverse its original comments regarding the extension of the infill building right up to the city wall, making the inner face of the wall an internal structure.

March 2026 minute:

The college have been exploring proposals to provide better facilities for the clergy and choir for over ten years. Proposals were initially put forward in 2015 with DAC delegation visits taking place in 2015 and 2017.

The current proposals include the following:

- Refurbishment of the existing choir and clergy vestries to include converting the existing clergy vestry into a music library and repurposing the existing choir vestry as robe and vestment storage and office.
- The chapel yard will be infilled to create a rehearsal room and provide WC and kitchenette facilities for the choir.
- The existing 20C clerk's vestry and part of the Wyatt organ stairs will be removed to provide step free access from the antechapel into the song school, to provide safer access to the organ and to improve the junction of the stair roof with the antechapel window.
- The existing step into the new robe and vestment storage/office will be removed to provide level access to the space. A new fire lobby will be incorporated as part of the fire precautions for the new development.

Earlier proposals for external stairs and a roof terrace have been omitted from the revised scheme. In its place, the existing copper roofs will be renewed with the addition of insulation with fixed ladder access provided for maintenance. The revised proposals take on board the previous advice from the DAC and statutory consultees.

Pending positive responses to formal consultation, the DAC resolved to delegate resolution of details to the subcommittee following which a Recommend Notification of Advice should be issued.

BUCKINGHAM: St Peter and St Paul

Application Ref 2026-124380	Buckingham	Listing : Grade I	EF
Proposals:	Selling by auction The Rudying's Bible		
Subcommittee:	Mr Julian Munby		
Project architect:	None		
Statutory consultees:	CBC		
Site visit attendees:	None		
Date of visit:			

March 2026 minute:

The Rudying Bible was presented to Buckingham, St Peter and St Paul in either 1461 or 1471 by Archdeacon John Rudying, its namesake. The bible itself may date from 1320, whilst it is not complete, it retains many of the 'Prologues' seen in the standard editions of the Vulgate and adds some others, especially in the Minor Prophets. The bible itself takes much of its value through its long link with the church, being originally housed in the old church, dating from Saxon times, which was demolished due to a tower collapse in the 1700s. Alienated from the parish in the 1700s, it was returned when found in an auction in 1855. The parish now store the bible in a safe, which has no temperature or humidity controls. The parish have decided to sell the bible to both find it an owner who will truly value it and to use the proceeds towards their youth mission.

It was noted that the proceeds of the sale would be used to support the mission of the parish. However, the view was ultimately that its long connection to the parish of Buckingham represented too strong a link to sever for financial reasons. The DAC asserted that heritage assets should not be considered financial assets for the current generation but should be considered treasures to be passed down to future generations.

The DAC resolved to align with the CBC guidance against the sale of church treasures for financial gain. The parish are to be encouraged to explore display options either within the church or at a local heritage site such as a museum or archive.

6 Casework - For Ratification

COWLEY: St Mary and St John

Application Ref 2025-112172	Oxford	Listing : Grade II	JS
Proposals:	Provision of servery in south aisle with accessible WC in base of tower, structural repairs to tower		
Subcommittee:	Revd Canon Dr Peter Groves, Mr Julian Munby, Mrs Sarah Tattersall, Ms Charlotte Robinson		
Project architect:	Mr David Spragg, Clews Architects		
Statutory consultees:	Victorian Society		
Site visit attendees:	Revd Canon Dr Peter Groves, Abigail Lloyd, Ms Charlotte Robinson		
Date of visit:	2 December 2021		

Previous Minute: January 2022

The parish are to be commended for their approach to this project and their willingness to phase the stages of the work allowing time to evaluate the success of each step before proceeding with the next. The DAC resolved to give in principle support to the proposed reordering and encourage the parish to continue to progress the proposals taking into consideration the comments contained within the site visit report.

Previous Minute: September 2025

The DAC resolved to give in principle support to the proposals for the introduction of a servery at the west end of the south aisle and accessible WC and storage in the base of the tower subject to submission of detailed proposals to the full committee. In respect of the proposed mid-infrared radiant heating, the DAC agreed that the parish should be asked to submit revised proposals based on far infrared units. The committee resolved to not recommend the proposals should the parish be unwilling to submit an alternative design.

March 2026 minute:

Since September 2025, the parish have continued to develop the proposals for the first phase of the reordering of St Mary and St John. Their architect has prepared detailed proposals for the following:

- Structural repairs to the west tower;
- Introduction of an accessible WC and storage in the ground floor of the west tower;
- Introduction of a servery at the west end of the south aisle; and
- Creation of a kitchen in the vestry at the east end of the church.

The Phase 1 proposals take into account the advice given in January 2022 including relocating the proposed servery to the west end of the south aisle. The proposals also take on board the DAC's advice to complete the structural repairs to the tower prior to introducing the facilities on the ground floor. ➡

The DAC considered that the proposals have been well developed and resolved to issue a Recommend Notification of Advice with resolution of details delegated to the subcommittee.

FOREST HILL: St Nicholas

Application Ref 2024-102757	Dorchester	Listing : Grade II*	JS
Proposals:	Conservation and loan of embroidered medieval altar frontal (originally a cope) to the Ashmolean Museum for a period of 5 years		

Subcommittee:	
Project architect:	
Statutory consultees:	Church Buildings Council
Site visit attendees:	N/A
Date of visit:	N.A
DAC officer summary and recommendation: In 2025, the Ashmolean's Curator of Medieval Archaeology visited the church to inspect the framed embroidered medieval altar frontal which hangs in the nave. She asked if the parish might consider loaning it to the museum for display in the England 400-1600 gallery. Originally a cope, it would have been a richly decorated garment in the opus anglicanum style. The remaining textile is a rectangular shaped panel of dark crimson silk velvet decorated with applied and embroidered motifs of angels standing on wheels with flowers and tendrils. The motifs are arranged in a fan shape radiating out from the flower motif above the central figure. The style and form of the embroidery indicate a late 15th or early 16th century date of manufacture. The SCBO consulted the Church Buildings Council in March 2025 about the proposals for conserving and loaning the cope to the Ashmolean. While they were content with the proposals to conserve the cope, they did not support the loan to the museum, preferring instead that it remain on display in the church in accordance with their guidance on Disposals and Loans. Given its proximity to the church, the DAC considered that the display of this rare survival of medieval embroidery at the Ashmolean would make it more available for viewing as well as providing a safer environment for it. For this reason, the DAC resolved to issue a Recommend Notification of Advice subject to the following proviso: During the 5 year loan period, should the museum decide that it no longer wants to display the textile, options for its safe return for display in the church should be investigated. The parish obtained a grant from the Leche Trust to cover the cost of conserving the textile and providing a new more appropriate frame. As a result of a misunderstanding, the parish proceeded with the conservation of the textile in November 2025 so the faculty will also regularise this work. It is proposed to display a professional digital image of the textile in the original frame in the church.
